TAWFIQ ZAYYAD — WEB DEVELOPER

Nazareth, Israel | +972545846820 | tofek.98@gmail.com | Linkedin | GITHUB

SUMMARY

Dedicated Web Developer looking to improve my Skills & Experience, with a focus on design-code integration. Strong attention to detail, effective communication, and a drive for continuous growth.

TECHNICAL SKILL

Languages: HTML | CSS | JAVASCRIPT | TYPESCRIPT

Technologies: GIT | GITHUB | REACT | VITE | REDUX | JWT | AUTH0 | Material UI
NODE JS | EXPRESS JS | MONGOOSE | MOGO DB | SOCKET.IO | WEBSOCKETS

Other: Data Structures | Algorithms | REST APIs | AWS LIGHT-SAIL | NginX | Linux OS | PWA

EXPERIENCE

Full Stack Developer

makesapp.co

Bootcamp Full Stack Internship. Collaborated with 3 interns to develop a hobby-based mobile first chat web app. Involved in all stages from requirements to coding (backend & frontend).

- **Demonstrated** Git proficiency through strategic pull requests, task-specific branches, and conflict resolution. Guided peers in applying best practices for efficient collaboration.
- **Worked** within an Agile environment, adhering to weekly sprints, delivering punctual demos, and participating in daily meet-ups.
- **Built** full-stack chatting system with instant translation, profanity detection, and automatic message deletion.
- **Designed** and refined object models with Mongoose schemas. Handled CRUD routes and requests for both users and chat messages.
- **Led** a deployment on AWS Lightsail ubuntu CLI OS with nginX reverse proxy. 🔗 **Recommendation Letter**

PROJECTS

- Arabrw ChatApp: (Intership)
  https://github.com/Makes-Innovation-Hub/arabrew#readme

- Built an Anti server-sleeper Full-stack MERN app with TYPESCRIPT , that ensures, the servers deployed on Render or any other deployment service stay awake and running effortlessly, avoiding idle-state.
  Full project details (including Website-link) : https://github.com/T1To48/hyper_ninja_app#readme

- Frontend App with React & Material Ui: https://a5cend.netlify.app/

- AWS Lightsail ubuntu CLI deployment step by step Guide: LINK

EDUCATION

Full Stack Development Bootcamp

Appleseeds academy DEC 2022 — JUNE 2023

- **Completed** a 6-month, 720-hour intensive bootcamp, where i developed deep understanding of MERN full stack web development
- **Demonstrated** the ability to work independently and as part of a team by completing group projects that simulated real-world situation..
- **Developed** strong problem-solving and high analytical skills 🔗 **Certificate**

DATA STRUCTURES & ALGORITHMS

ZERO TO MASETRY (ZTM)

- Efficiently implemented data structures such as arrays, linked lists, hashtables, stacks, and queues.
- Applied advanced searching and sorting algorithms to optimize code.
- Gained knowledge about time and space complexity, importance and tradeoffs
